

# CPG Package Test — Questionnaire

Electric Insights · Beer Concept Test (Garage Beer) · n = 803

This document reproduces the questionnaire used in the Electric Insights CPG case study. It is published in the interest of methodological transparency: every variable shown in the Survey Explorer and Model Builder traces back to one of the items below. The questionnaire is reproduced as it was administered, with the exception of light formatting changes (en-dashes, currency symbols) made for legibility. Hidden recodes (prefixed with **h**) are derived variables and were not shown to respondents.

**Variable codes in brackets** match the column names in the dataset and the variable labels shown throughout the Electric Insights CPG tools. **Q21** is the primary outcome modeled in the case study (purchase intent on the test brand's package).

## Screening Questions

*Used to qualify respondents and capture core demographics. Hidden recode variables (hS1, hS2, hS4) are derived from the visible answers and used in modeling.*

### [S1] To begin with, what is your gender?

- Male
- Female
- Non-binary / other
- Prefer not to say

### [hS1] HIDDEN: Gender recode (2-point).

- Male
- Female

*Recoded from S1; collapses non-binary/refused into the modal categories or excludes from binary analyses.*
